

Final Presentation – Group Rubric

	Excellent (A)	Satisfactory (B-C)	Unsatisfactory (D-U)
<i>The Big Picture</i>	Motivation for the topic is explicitly stated, and important results as well as their influence are clearly presented and easily digested by listeners. <i>“This is why you should care about this!”</i>	The big picture is apparent, but it is either unclear what the implications of the results are, or it is hard to tell which are the important results.	The presentation lacks an overall motivation or big picture interpretation.
<i>The Details</i>	Enough details are included that listeners can understand the proofs of the results, but some smaller details may be explained away or eliminated for the sake of clarity and understanding. Presenters clearly understand the details they choose to present.	Either many details are glossed over, or, on the other hand, presenters get bogged down in the nitty gritty details of the proofs and lose sight of the overall picture. Presenters get lost on some of the details.	The presentation either lacks detail entirely, or the presenters include an overwhelming amount of details that are poorly explained.
<i>Definitions and Theorems</i>	Definitions and Theorems are explicitly stated, and the mathematical language is precise and clearly explained. Examples are used where appropriate to illustrate these concepts.	Definitions and Theorems are stated precisely, but not explained well or illustrated properly.	Definitions and Theorems are stated in an imprecise or obfuscated manner.
<i>Organization/ Aesthetic</i>	The presentation is intentionally organized and easily followed. Beamer and LaTeX typesetting are used appropriately, and slides are thoughtfully crafted (not too cluttered).	The presentation is organized, but there are some errors in typesetting or cluttering of slides.	The presentation is disorganized or difficult to follow.
<i>Pace and Timing</i>	The presentation is at a good pace to follow and finishes in under 25 minutes.	The presentation is a bit too slow-paced or fast-paced, and/or needed to rush to the end or was cut off a bit before finishing at 25 minutes.	The presentation is the wrong pace and finished in under 15 minutes or was nowhere near done at 25 minutes.

Final Presentation – Individual Rubric

	Excellent (A)	Satisfactory (B-C)	Unsatisfactory (D-U)
<i>Clarity</i>	Articulate and proper use of mathematical language. Speaks clearly, loud enough, and at a comfortable pace.	Proper use of terms. Quieter voice.	Improper use of terms. Mumbling and/or quiet sentences.
<i>Teaching Style</i>	Student teaches to the class and engages with them instead of reading from slides or notes (brief references are absolutely appropriate).	Frequent reference to notes. Intermittent engagement with the class.	Mostly reads notes. Very limited or no engagement with the class.
<i>Preparedness</i>	Able to answer all questions.	Able to answer questions with assistance.	Unable to answer questions.
<i>Vibe</i>	<i>"I've got this!"</i>	<i>"I think I understand most of this, but I'm still a little lost on some of the details."</i>	<i>"I have no idea what's going on."</i>
